

Productivity

Eliminate wasted time by:

- using faster-to-install products
- better and safer tools and techniques
- prefabrication
- standardisation
- efficient processes

Safety

Eliminate root causes of accidents by:

- improving access to high level services
 - improving material handling
- improving workplace practices and housekeeping
 - eliminating hot works
 - eliminating known hazards

Process improvement

Environmental

Eliminate waste by:

- less packaging
- less scrap
- reducing energy
- using sustainable sources

Quality

Eliminate defect potential by:

- employing fewer components
- using known pre-tested products
 - repeatability
 - product training
